

Run-5 update

Fulvia Pilat

Time Meeting
November 16, 2004

Injectors/RHIC start-up - update

Assume here we start cool-down Wednesday 17.

Tandem/Booster set-up started – yesterday: 1 transfer $8.7 \cdot 10^9$

Change of source last night

RHIC Dry Run 3

Mon Nov 8: Day 1

Elog (Todd, Ila, Greg, Fulvia): *configuration pages, tune plots, new features*

FDView (Todd, Fulvia, John): *test, data integrity*

StartUp RHIC (Fulvia, Todd, Ted): *Linux and Sun applications*

Documentation (Fulvia, Todd, Greg) *check availability*

RHIC operation GPM's (Fulvia, Todd, John) *ramp, magnets, beam current, fill pattern, Cu-calibrations, etc.*

Logger (RogerL) *logger test with new file system*

LogView (Ted) *new logview features, arrays visualization*

Sequencer (Todd, Ted): *test – see below*

Ramping systems (Al, Steve, Nikolay, Todd): *Cu ramp, WFG Manager, ramp revert with RF online model*

AtR copper (Woody) *setpoints for copper, WFG manager, current transformers, orbits, measurement of losses*

Tue Nov 9: Day 2

Ramping systems (Al, Steve, Nikolay, Todd): *Cu ramp, WFG Manager, ramp revert with RF online model*

WCM (RogerL, Todd) *tcl scripts, test*

SkewMod (Yun, Jonathan) *injector, ramping mode, demonstrate modulation on ramp, readouts, correction tools*

JumpWatch (Christoph) *testing, transition diagnostics*

IPM (RogerC, SteveT) *test application feature*

Abort kickers (Leif)

Low intensity bunches interlock (Rob) *re-test functionality*

AGS field correction (Ioannis, JohnM) *check low-level*

Permit link (Rob)

Wed Nov 10 AM: Day 3 - morning

RhicInjection (Wolfram, Todd): *test AGS field correction, BPM data acquisition, benchmark application, low intensity interlock*
Loss monitors (Mei) *RhicLossMonitor, ATR/Injection data acquisition, new BLM's at Q2*
BPMs (Todd) *Managers, Timing, integrated test new boards*
OrbitDisplay (Vadim) *test*
Ramp Orbit correction (Vadim) *test*
Tune meter (Angelika, Rob) *set to lower tunes*
PLL (PeteC, Al-DP): *test PLL user interface all channels, check system readiness for ramps*
RhicChromaticity (Steve): *ADO, GPM, modulation test with crystal PLL*
DQmin (Joanne): *re-test with Artus, Schottky, PLL*
RF applications (TomH.) *test of RF applications – see below*
Cogging scope (RogerL)
Damper scope (RogerL)
BERT (Seth, Greg)

Wed Nov 10 PM: Day 3 - afternoon

Schottky (Kurt): *test, user interface*
Tune display (Dan): *test*
Rhic Vacuum Display, Pressure display (Haixin, DickH, Seth): *test*
e⁻ detectors (Ubaldo, SY): *test*
Transverse injection damper (Angelika, Rob)
BLAM (John, PeterI)
STAR Magnet PS Control (Seth) *test functionality of application*

Fri Nov 12 AM: Day 4 - morning

Collimators (Angelika, Wenge): *test, start from sequencer, new vertical collimators*
IR Bump (Fulvia, Sev): *test existing features, test new 'coupled' bump, RMS orbit acquisition*
LISA (Angelika, Ted): *test, start from sequencer*
Gap cleaning (Angelika) *test, setup for copper*
IPM (RogerC, SteveT) *integrated test application and new IPM's – connected – 4planes*
Loss monitors (Mei) *test new BLM's at Q2 and in AtR*
SkewMod (Yun, Jonathan) *one more test ramp*
RhicChromaticity (Steve): *test dispersion measurement software*
Plotfill (Todd) *recover functionality*
RhicInjection (Wolfram, Todd, John): *integration test – interlock, AGS field, BPM's*

Ops art...☺

Screen saver in action

Virtual electron clouds

Chromaticity on the ramp

Loss monitors, abstract
